

Emerging Opportunities in Forestry

Social Support for Active Forest Management

- **Core Components**
 - **Restoration** - Improved biodiversity, habitat productivity and climate resilience
 - **Economic Development** – Value-added products for local markets + utilization of waste from thinning, logging and habitat enhancement
 - **Workforce Development** - Long-term approach that includes youth and adults
- **Key Ingredients**
 - **Legacy Infrastructure** - Maintain existing roads, LTFs, etc. where feasible
 - **Applied Research** - Project layout, silviculture prescriptions, logging methods, processing methods, market development and shipping
