

Southeast Conference Biomass Update

Karen Petersen
Biomass Coordinator

The Pellet Mill is being constructed!

AND we are getting a Chipper/Grinder

Biomass Development Opportunity ZONE

BDO Zone overview

The BDO Zone Initiative is a certification and regional risk rating program that enables economic development agencies and communities to effectively and credibly disclose feedstock and infrastructure attributes and risks and promote biobased development opportunities to developers and investors around the world.

A BDO Zone rating is a technical, standards-based assessment of regional manufacturing readiness with respect to local development potential for biofuel, renewable chemical, biogas or bio-product plants.

Prince of Wales Integrated Forest Products Campus
